

- Composition instead of Inheritance (Use functions not classes)

## Folder structure:

- Screens ( e.g. routed pages)
- Components(e.g. TopNavBar.js)
- Services(API call exported functions)
- Hooks(Custom hooks form validations)
- Types (Typescript interfaces)
- Helpers(Any re-useable functions that does something useful)

Path	Description
/src/screens	Page Layout components
/src/components	Application components
/src/services	Service helpers
/src/hooks	Hooks
/src/types	Types
/src/helpers	Helpers
